

Statements and Response to Reviewer's Comments

Modular Academic LaTeX Framework: Seamless Multi-Publisher Manuscript Migration

Dear Editor and Reviewers,

Thank you for your constructive comments and thoughtful guidance regarding our manuscript. We have carefully addressed all reviewer questions and revised our manuscript accordingly. Below is our point-by-point response.

Reviewer's Comment 1.1[]:

The motivation for cross-publisher decoupling is clear, but could the authors elaborate on citation engine compatibility and URL wrapping across venues?

Author's Response:

Thank you for this insightful question. We have clarified the bibliography mechanism in Section 2:

Changes in Manuscript

Our architecture integrates the xurl engine to guarantee smooth URL wrapping across all publisher column constraints, alongside native support for BibTeX and BibLaTeX backends.
